Surname GALASSI

First / second name ALFREDO / RUGGERO

Nationality Italian

Date and place of birth 10-8-1960 Catania, Italy

Languages Italian (mother tongue), written and spoken English.

Qualification

- **Degree in Medicine and Surgery**, University of Catania Medical School, 1978-1984 graduated (2 July 1984) with the grade 110/110 with distinction, with the following graduation thesis “La cardiostimolazione permanente” Chairman Prof. F. Sorrentino.

- **Qualifying Examination in Medicine and Surgery** for medical practice, University of Catania 1984.

- **Associate Professor of Cardiovascular Disease**, Faculty of Medicine and Surgery, University of Catania, Department of Internal Medicine e Systemic Disease, from the 1st December 2006 and Director of Diagnostic and Cardiovascular Interventional Laboratory, Clinical Division of Cardiology, Cannizzaro Hospital from the 6th September 2011.

- **Senior Consultant in Interventional Cardiology**, at the University of Zurich, from 5 March 2014 with an open-ended employment contract, with both teaching activity of interventional cardiology devoted to fellows and cardiologists and research activity in the field of chronic total occlusions.

Post-Doctorate Qualification

- **Diploma in Cardiology**, course at Hammersmith Hospital, Royal Postgraduate Medical School, University of London, United Kingdom 1985-1986 and awarded (19 July 1986) the Diploma in Cardiology by the University of London with the following graduation thesis “Guidelines for rationale therapy of unstable angina” Chairman Prof. A. Maseri.

- **Specialization in Cardiology**, University of Catania 1984-1988 and awarded (25 November 1988) the Diploma of Specialization in Cardiology with the grade 50/50 with distinction, with the following graduation thesis “Evaluation of the different response of antianginal drugs during exercise testing in patients with chronic stable angina” Chairman Prof. G. Giuffrida.

- **Specialization in Nuclear Medicine**, University of Bologna, 1988-1991 and awarded (10 July 1991) the Diploma of Specialization in Nuclear Medicine with the grade 66/70,

with the following graduation thesis “Measurements of regional myocardial perfusion by positron emission tomography with $H_2^{15}O$ in patients with coronary artery disease; comparative assessment with single photon emission tomography and $e^{-99m}Tc-MIBI$ ”
Chairman Prof. A. Abbati.

- **Awarded the Qualification as Associate Professor** at Faculty of Medicine and Surgery, University of Rome “La Sapienza”, 17 August 2006.

Appointments and Education

5 August - 30 September 1984. Internal medical doctor at the Department of Cardiovascular Surgery, Stanford University School of Medicine, Stanford, USA.

1 October 1986 - 10 September 1991. Employed full time and paid as **Research Fellow/Registrar** with clinical responsibilities in the diagnostic work up and management of patients with cardiovascular diseases in the Cardiovascular Research Unit of the Department of Medicine, Royal Postgraduate Medical School, Hammersmith Hospital, London, United Kingdom. His supervising Consultant has been Professor Attilio Maseri MD, FRCP, Sir John McMichael Professor of Cardiovascular Medicine.

6 October 1988 - 25 September 1990. During this period he has been also working as research investigator, in the Medical Research Council, Cyclotron Unit, Hammersmith Hospital, under the supervision of Dr Terry Jones DSc. His research projects were also performed in conjunction with the Nuclear Medicine Section of the Department of Diagnostic Radiology, Hammersmith Hospital under the supervision of Professor J P Lavender, MB ChB FRCP FRCP.

1 October 1992 - 22 December 1994. Internal medical doctor in the Institute of Internal Medicine and Geriatrics, University of Catania, under the supervision of Prof. L. Motta. During this period he has been involved in research project and diagnostic work up and management of patients with cardiovascular diseases.

23 December 1994 – 5 December 1996. Registrar in the Institute of Cardiology, Ferrarotto Hospital, University of Catania, under the supervision of Prof. G. Giuffrida, full Professor of Cardiology.

27 May 1996 – 5 December 1996. Senior registrar appointee in the Institute of Cardiology, Ferrarotto Hospital, University of Catania, under the supervision of Prof. G. Giuffrida, full Professor of Cardiology.

6 December 1996 – 30 July 1999. Senior Registrar in the Institute of Cardiology, Ferrarotto Hospital, University of Catania, under the supervision of Prof. G. Giuffrida, full Professor of Cardiology.

January 1995 – October 1999. During this period he has been also working as research investigator, in the Institute of Radiology of the University of Catania, under the supervision of Prof. Salvatore Musumeci, full Professor of Nuclear Medicine.

From 31 Luglio 1999 to 30 November 2006. Senior Registrar, in the Institute of Cardiology, Ferrarotto Hospital, University of Catania; he was the Director of Diagnostic and Cardiovascular Interventional Laboratory, Clinical Division of Cardiology, Ferrarotto Hospital from the 15th December 2005.

From 1994 to 31 July 2011. During this period Prof. Galassi has performed more than 6000 invasive diagnostic angiographic procedure (diagnostic coronary angiogram, angiographic arterial examination, endomyocardial biopsy, temporary pacemakers) and more than 3000 percutaneous coronary interventions (as first operator with and without the use of stents, complex angioplasty such as elective chronic total occlusion, bifurcation lesions, left main trunk stenosis, or acute myocardial infarction in the Diagnostic and Cardiovascular Interventional Laboratory, besides conducting more than 4000 non invasive diagnostic examinations (such as nuclear studies, exercise testing etc) at the Clinical Division of Cardiology, Ferrarotto Hospital, University.

From the 1st December 2006 – onwards. Associate Professor of Cardiovascular Medicine, Faculty of Medicine and Surgery, University of Catania, Department of Medical Sciences and Pediatrics and Director of Diagnostic and Cardiovascular Interventional Laboratory, University Clinical Division of Cardiology, Ferrarotto Hospital till July 31st, 2011. From August 1st, 2011 till August 6th, 2015 Director of Diagnostic and Cardiovascular Interventional Unit, Cannizzaro Hospital, Department of Clinical and Experimental Medicine, University of Catania. From November 1, 2016 he is working in the Unit of Cardiology, University Hospital Policlinico, Vittorio Emanuele, within the Department of Transplant, Vascular and Cardiothoracic

From November 1, 2016 – onwards he is working in the Unit of Cardiology, University Hospital Policlinico, Vittorio Emanuele, within the Department of Transplant, Vascular and Cardiothoracic

Scholarship

1 June 1987 - 30 September 1987. Recipient of an ARMED fellowship, awarded for research on "Syndrome X" within the Cardiovascular Research Unit of the Royal Postgraduate Medical School of Hammersmith Hospital, London. The fellowship was awarded on the basis of titles and examination.

1 June 1988 - 30 September 1988. Recipient of an ARMED fellowship, awarded for research on "mechanism of action of calcium channel blockers and beta-blockers in chronic stable angina" within the Cardiovascular Research Unit of the Royal Postgraduate Medical School of Hammersmith Hospital, London. The fellowship was awarded on the basis of titles and examination.

1 June 1990 - 30 May 1992. Recipient of a **Consiglio Nazionale Ricerche** fellowship, (Law 1/08/88 no.326 Comitato Nazionale per le Scienze Biologiche e Mediche) Institute of Medical Radiology, Institute of Bioimages e Physiopathology of Central Nervous System, University of Catania. During the period January 92 - July 92 he has been also working as research investigator in the Institute of Nuclear Medicine and Consiglio Nazionale Ricerche, San Raffaele Hospital, Milan under the supervision of Prof. F. Fazio.

Continuing Education Courses

10 - 11 March 1999. He attended the course on radiation protection " Corso di formazione in materia di radioprotezione" with final examination , at "Azienda Ospedaliera Vittorio Emanuele, S.Bambino e Ferrarotto di Catania".

15 November 2002. Attendance at the Course on "Il miglioramento della qualita' nelle strutture sanitarie: rilevanza dell'azione di coinvolgimento diffuso degli operatori", which was held at Vittorio Emanuele, Ferrarotto, S. Bambino, Hospital.

Research projects

Prof Galassi was coinvestigators of the following research projects at the Division of Cardiology, Department of Internal Medicine and Systemic Disease of the University of Catania.

1996-1997. Subinvestigator in the randomized, double blind, multicentric project, INTIME. (Intravenous nPA for Treatment of Infarcting Myocardium Early). The objective of the study was to assess the safety and efficacy of the IV injection of nPA to reperfuse an acute myocardial infarction. The work has been published on *Circulation* 1998; 98: 2117-25. List of investigators are reported from page 2122 to page 2124.

1999-2003. Coinvestigator in the multicentric project ACTOR (The Aggressive versus Conservative Treatment Of infarct Related artery after acute myocardial infarction)-OAT (Occluded Artery Trial). A Study proposed by the Italian Society of Invasive Cardiology and from ANMCO which drained in the multicentric american study OAT. The objective of the study was to assess if the reopening of the necrotic vessel within 1 month from infarction and without symptoms, might provide a reduction of cardiovascular events at a 3 years follow-up. Achievement of the title of “Excellent Result” on the 30 September 2005. The design and methodology of the study have been published on the *American Heart Journal* 2005; 150: 62-42, (prof Galassi is among investigators pag 635) while the final study has been published on the *NEJM* 2006, 235, N23 in its appendix prof Galassi as investigator of the study is named on page 6).

2000-2001. Coinvestigator in the multicentric project TRENDS (Tetra Randomised European Direct Stenting Study) (Randomised evaluation of the ACS multilink TETRA coronary stent system in the treatment of patients with de novo and restenotic native coronary artery lesions using a pre-dilatation versus no predilatation implantation strategy). The objective of the study was to assess the efficacy of the TETRA stent using a predilatation and non-predilatation strategy during PTCA procedure. The work has been published on the *American Journal of Cardiology* 2006; 98: 316-21.

2001. Coinvestigator in the Euro Yeart Survey on Coronary Revascularization and Chronic Angina. The objective of the study was to execute a survey among all european countries about the revascularization modalities for patients with ischemic heart disease in order to improve the quality of life and decrease cardiovascular diseases. The work has

been published on the European Heart Journal 2005; 26: 1169-79. Prof Galassi is among investigators at pag 1177.

2001-2002. Coinvestigator in the multicentric project SAFE (Sorin and Aspirin Following Elective stenting). The objective of the study was to assess the efficacy of two different antithrombotic regimens (only aspirin or aspirin + ticlopidine or clopidogrel) in regards to thrombosis and vascular complications during PTCA with a new type of carbon stent (carbostent). The work has been published on the American Journal of Cardiology 2007; 99: 1062-66. Prof Galassi is among principal authors and investigators as reported at page 1066.

2001-2003. Coinvestigator with a three years contract for the research project assigned by the European Union for the V Programma Quadro which title is “Enhanced Personal, Intelligent and Mobile System for Early Detection and Interpretation of Cardiological Syndromes - EPIMEDICS”. The work has been published on the Journal of Electrocardiology, 38; 2005: 100-106. Prof Galassi is among principal authors of the study and as representative of the University of Catania, as per contract for occasional work signed on the 2 of January 2001.

2002. Coinvestigator in the Euro Yeart Survey on Angina Pectoris. The objective of the study was to execute a survey among all european countries regarding the admission modalities for patients with angina pectoris in order to provide improvement in qualità of life and decrease the impact of cardiovascular diseases. The work has been published on the European Heart Journal 2005; 26: 996-1010. Prof Galassi is among investigators at pag 1008.

2003. Coinvestigator in the REALITY trial. This was a prospective randomized multicenter comparison of the Cypher Sirolimus-eluting and the Taxus Paclitaxel-eluting stent systems. The objective of the trial is to compare the efficacy of two different types of eluting stents in patients with coronary artery disease who underwent revascularization procedures. The work has been published on JAMA 2006, 295 (8): 895-904.

2003. Coinvestigator in the IDEA (The Italian Drug Evaluation in Angioplasty). This is a registry which has evaluated the pharmacological therapy during procedures of coronary revascularization, in 79 centres evenly distributed on the national territory. On behalf of the IDEA Survey investigators and the Italian Society of Invasive Cardiology –

GISE. The work has been published on the Italian Heart Journal 2005; 6 (2): 106-118. Prof Galassi is among principal authors and investigators as reported at page 116.

2003-2007. Principal Investigator in the FINESSE trial (Facilitated Intervention with Enhanced reperfusion Speed to Stop Events). This is a multicenter randomized double blind placebo controlled trial for patients presenting with ST segment elevation myocardial infarction. The objective of the trial is to demonstrate that rapid administration of aspirin abciximab, reteplase, and heparin followed by early catheterization and intervention, when not contraindicated, is superior to the administration of aspirin and heparin followed by diagnostic angiography and primary intervention with abciximab after angiography when not contraindicated. The work has been published on Journal of the American College of Cardiology Intv 2010; 3: 1284-91. Prof Galassi is among principal authors and investigators as reported in the statement of investigator.

2008-2011 Principal Investigator of the IRCTO (Italian Registry on Chronic Total Occlusion). This is a observational Registry executed among 61 italians centers whose objective was that of assessing prospectively the prevalence, therapeutic choices, and short and mid-term prognosis (up to 3 years) of patients with angiographic evidence of a chronic total occlusion in a major coronary artery. The work has been published on the European Heart Journal. Tomasello SD, Boukhris M, Giubilato S, Marzà F, Garbo R, Contegiacomo G, Marzocchi A, Niccoli G, Gagnor A, Varbella F, Desideri A, Rubartelli P, Cioppa A, Baralis G, Galassi AR. Management strategies in patients affected by chronic total occlusions: results from the Italian Registry of Chronic Total Occlusions. Eur Heart J 2015; 36: 3189-3198 (IF 15.203).

2008-2011 Study Coordinator of the ERCTO (European Registry on Chronic Total Occlusion). This is a observational web based registry executed among 23 european operators whose objective was that of assessing retrospectively patients with angiographic evidence of a chronic total occlusion in a major coronary artery, who underwent revascularization by coronary angioplasty and retrograde approach: percentage of revascularization success, techniques of choice, and short and mid-term prognosis (up to 3 years) are going to be evaluated in this registry. The work has been published on the Journal of the American College of Cardiology 2015; 65 (22): 2388-400 (IF 15.32) and signed by prof Galassi as senior author.

2011-2014 Principal Investigator in the Board of Steering Committee of the EURO CTO Trial (A Randomized Multicentre Trial to Evaluate the Utilization of Revascularization or Optimal Medical Therapy for the Treatment of Chronic Total Coronary Occlusions). This is a randomized study, executed by expert CTO operators around Europe, members of the EURO CTO club, who assess the efficacy and safety of percutaneous revascularization for chronic total coronary occlusions (CTO) in comparison to medical therapy in patients with coronary artery disease and stable angina pectoris. The results of the study will be presented at the next European Congress of Cardiology 2017 and published on a peer reviewed journal.

Participation in the creation of new companies (spinoff), development, use and commercialization of patents

The undersigned Prof Alfredo Galassi, who has done several research projects with the aid of the intracoronary ultrasound energy system for the unblocking of coronary chronic total occlusions (Galassi AR, SD Tomasello, Costanzo L, Campisano MB, Marza F, Tamburino C. recanalization of complex coronary chronic total occlusions using the high-frequency vibrational energy CROSSER catheter as first-line therapy: a single center experience. J Interv Cardiol 2010; 23: 130-38.) has participated as principal investigator, to the drafting of a nonprofit protocol called "Cardioprolific for the interventional treatment of de novo coronary lesions and small-vessels whose development has been approved by the Ethics Committee for clinical trials of Cannizzaro, with the resolution N.2559 dated 22/10/2013. Specifically, the protocol states that the ultrasonic energy is employed in combination with the topical intracoronary administration of an antiproliferative drug in patients with stent restenosis or with de novo coronary lesions in coronary arteries with less than 2.25 mm diameter. Based on these studies and researches the Cardioprolific Inc Reno, NV, USA has developed and has approved in quality of Assignee the Patent No: US 9,375,223 B2 dated June 28, 2016, for the application of such a device in the coronary and vascular field.

Didactics

School Years 1988/90. During these years in whom Dr. Galassi has been employed full time and paid as **Research Fellow/Registrar** in the Cardiovascular Research Unit of the Department of Medicine, Royal Postgraduate Medical School, Hammersmith Hospital, London, United Kingdom he was appointed a Teaching Course for the students of the University of London, Diploma of Cardiology.

School Years 1993-1994, 1994-1995, 1995-1996, 1996-1997, 1997-1998, 1998-1999. During these years Dr. Galassi has cooperated with Prof. Giuffrida, in performing practical exercise in cardiology, for the students of the IV year of the Degree in Medicine, section C, of the University of Catania.

School Years 1993-1994, 1994-1995, 1995-1996, 1996-1997, 1997-1998, 1998-1999. During these years Dr. Galassi has cooperated with Prof. Giuffrida, a full Professor of “Cardiovascular Clinic and Pathology” in teaching the students at the IV year of Specialization in Cardiology, Faculty of Medicine and Surgery, of the University of Catania.

School Years 1997-1998. Coordinator and teacher of the “Specialization Course in Nuclear Cardiology” held at the University of Catania.

School Years 1999-2000. Adjunct Professor at the University of Catania, for the Course of “Nuclear Immunological Techniques” as part of the teaching of “Clinical Pathology” at the School of Specialization in Clinical Pathology.

School Years 2000-2001. Adjunct Professor at the University of Catania, for the Course of “Nuclear Cardiology” as part of the teaching of “Non invasive diagnostic examination III” at the School of Specialization in Cardiology.

School Years 2001-2002. Adjunct Professor at the University of Catania, for the Course of “Nuclear Cardiology” as part of the teaching of “Non invasive diagnostic examination III” at the School of Specialization in Cardiology.

School Years 2002-2003. Adjunct Professor at the University of Catania, for the Course of “Nuclear Cardiology” as part of the teaching of “Non invasive diagnostic examination III” at the School of Specialization in Cardiology.

School Years 2003-2004. Adjunct Professor at the University of Catania, for the Course of “Nuclear Cardiology” as part of the teaching of “Non invasive diagnostic examination III” at the School of Specialization in Cardiology.

School Years 2004-2005. Adjunct Professor at the University of Catania, for the Course of “Nuclear Cardiology” as part of the teaching of “Non invasive diagnostic examination III” at the School of Specialization in Cardiology.

School Years 2005-2006. Adjunct Professor at the University of Catania, for the Course of “Nuclear Cardiology” (D.M. 21.05.98, n 242) as part of the teaching of “Non invasive diagnostic examination III” at the School of Specialization in Cardiology

From the 1st December 2006. Faculty of Medicine and Surgery, University of Catania, from the 1st December 2006 and Director of Diagnostic and Cardiovascular Interventional Laboratory, Clinical Division of Cardiology, Ferrarotto Hospital from the 15th December 2005.

School Years 2006-2007. He has been keeping a Course for Radiological Technician at Medical Radiology for Images and Radiotherapy and a Course in Physiotherapy at the University of Catania, Didactic Centre of Ragusa

6 April 2009. Awarded the title of Visiting Professor in Cardiology, at the Faculty of Medicine, University of Belgrade, Serbia with both teaching activity of interventional cardiology in complex coronary lesions and chronic total occlusions devoted to fellows and cardiologists and research activity in the field of complex coronary lesions and chronic total occlusions.

School Years 2007-2008, 2008-2009, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016. Lectures of the topic “Intensive Care Unit Therapy” at the IV year of the School of Specialization in Cardiology, University of Catania.

School Years 2013-2014, 2014-2015, 2015-2016. Commission member of the Research Doctorate in Biomedicina Traslazionale (Internazionale) of the University of Catania.

3 September 2013 – 4 December 2014. Awarded the title of **Senior Consultant in Interventional Cardiology**, at the University of Zurich, Switzerland.

From 1 February 2014 he had an open-ended employment contract of Senior Consultant in Interventional Cardiology, at the University of Zurich, Switzerland with both teaching activity of interventional cardiology devoted to fellows and cardiologists and research activity in the field of chronic total occlusions.
